

## Questions to ask your doctor

It's important to fully understand the cataract procedure before making any decisions with your doctor. Below, you can find a list of questions to ask your doctor, so both of you can decide on the best treatment option for your needs.

### **About the surgery**

- What are my options to treat my cataracts or presbyopia?
- What are my options to treat my cataracts as well as astigmatism?
- How long will the surgery take?
- How long will it take to recover?
- Is the surgery and recovery painful?

### **About my lens options**

- What are the different kinds of lenses available?
- Which one will best suit my vision and lifestyle needs?
- I like the idea of not wearing glasses. Am I a candidate for a multifocal lens?
- Is there a lens that allows me to drive safely at night or function in dimly lit situations?
- I have astigmatism. Am I a candidate for a toric lens?

### **About payment options**

- How much will my procedure cost?
  - Will my insurance cover everything?
- Is there a payment plan or financing to cover any additional costs?
